Dear Sir/Ma'am,

As a graduate school student in the field of ECE from IGDTUW university, I was thrilled to apply for —. My previous experience in Computer Network Security Problems and Countermeasures has helped to develop my methodology, data analysis, and research expertise in this field.

I'm confident that I have the necessary skills to be a great addition to your research team and the Computer Network Security Project you're conducting.

During my time in graduate school, I gained exposure to research in Computer Network Security, including extensive study in Computer Network. My studies and research in these areas give me a strong foundation with which to carry out the tasks of the Computer Network Security intern.

A few of my past achievements include:

- Worked to improve Computer Network Security issues and also make it easy for others to understand Computer Network Security issues.
- Make large excel data every day about my research.
- Read more than 10+ research papers to understand problems more clearly.
- Studied and wrote my dissertation on Computer Network Security by researching unknown facts about that.

As a student, I am incredibly proud of these accomplishments and feel that, if given the opportunity to join your Research Fellowship Program, that I could provide that same value, focus, and attention to detail for Sample Company.

Thank you for the opportunity to apply and I look forward to our next conversation, where I hope I can provide even more detail on why my experience makes me a great candidate for this research internship.

Sincerely,
Sanju
